

REMARKS

Claims 1 to 51 are pending in this application. Applicants respectfully note that claims 49-51 were newly added with the preliminary amendment filed on October 13, 2004.

Claims 1 to 48 are subject to restriction under 35 U.S.C. § 121 as follows:

Group I. Claims 1-18 drawn to a method for detecting ketosteroids comprising reacting a sample with a sulfonylhydrazide, classified in class 436, subclass 140.

Group II. Claims 19-29 drawn to a method for enhancing positive ion mode electrospray ionization efficiency of a carbonyl compound comprising reacting a carbonyl compound with a sulfonylhydrazide, classified in class 436, subclass 173.

Group III. Claims 30-42 drawn to a method for separating and detecting ketosteroids present in a biological sample, classified in class 436, subclass 161.

Group IV. Claims 43-48 drawn to a method for detecting ketosteroids in a sample comprising reacting the sample with a carbonyl protecting reagent, classified in class 436, subclass 176.

Applicants hereby elect to prosecute the subject matter of Group I without traverse.

Applicants also note that because claims 49-51 depend from claim 43, they are most likely in Group IV. Accordingly, claims 19-51 have been withdrawn without prejudice from consideration.

Accordingly, upon entry of these amendments, claims 1-18 will remain pending upon entry of these amendments. No new matter is entered upon entry of these amendments.

Applicants request the Examiner to examine these claims at his earliest convenience.

DOCKET NO.: NIHA-0249 / E-103-2002/0-US-03
Application No.: 10/511,409
Office Action Dated: October 2, 2008

PATENT

If the Examiner has any questions, the Examiner is invited to call the undersigned at
(215) 564-8969.

Respectively submitted,

Date: December 2, 2008
